Please refer to the [image service terms of use](#) if you are unsure about usage permissions.

Please be aware that the image file size sent from this service may be up to 5 MB, which may cause problems if you are using dial-up internet access or if your email service has a limited attachment size or storage capacity.

Our original 'master' digital images vary in size and quality. If the image you receive is less than 2,500 pixels along the longest edge, it is because the master image is smaller.
